Description:

Foundations for Multilingualism in Education: from Principles to Practice equips pre-service and in-service educators with the knowledge and skills they need to make informed language and literacy education decisions in multilingual schools. It also shows multiple pathways for advocacy through classroom and school practices and policy-making, and sets an agenda for research from a multilingual perspective. This foundational text takes a comprehensive, pluralistic approach to theory and research on multilingualism in education. De Jong goes beyond traditional discussions

about "the best bilingual or multilingual model", and introduces four core principles that are applicable across a wide range of multilingual contexts: 1) *Striving for Educational Equity*, 2) *Affirming Identities*, 3) *Promoting Additive Bi/Multilingualism*, and 4) *Structuring for Integration*. Readers learn to apply these principles to practice, policy-making, and research in bilingual, multilingual, and English-medium school contexts.

Multilingual Education for All: Applying an integrated multilingual curriculum model to low-income contexts Carol Benson. 101. 7. To this end, we actively support research into multilingualism in order to facilitate a shared understanding of what works and doesn't work in practice and where there are significant challenges. The 11th Language & Development Conference has been a cornerstone of that work in India and we will continue to build on the legacy outcomes and research agenda that is discussed in the appendix to this volume. Bilingualism in Education: Aspects of Theory, Research and Practice. London: Longman. Emeneau, M.B. 1967.
