Contents

Contributors	x
Preface	xv
I	SETTING THE FRAME: SUSTAINABLE FARMING AND RURAL DEVELOPMENT
1	Farming and Rural Systems - State of the Art in Research and Development 3 <i>Werner Doppler</i>
2	Prototyping Integrated and Ecological Arable Farming Systems (I/EAFS) within a EU-Network 22 <i>P. Vereijken</i>
3	Integration of Bio-technical, Economic and Social Sciences 41 <i>Jacques Brossier and Bernard Hubert</i>
4	Sustainability in Dryland Farming Systems 66 <i>Elias Fereres</i>
5	Livestock Farming Systems, Research and Development Issues 71 <i>A. Nardone and A. Gibon</i>
II	DESIGNING SUSTAINABLE AGRO-ECOLOGICAL SYSTEMS
6	Overview and Discussion: Sustainable Agro-Ecological Systems 95 <i>Giancarlo Campolmi</i>
7	Consultative Appraisal: Linking Farmers' and Researchers' Perspectives for a Mediation of a more Sustainable Agriculture 100 <i>S. Anderson, S. Gündel, M. Marais and T. Wondewossen</i>
8	Technology Transfer Study of Integrated Farming Systems in a Small Arable Crops Region with Environmental Constraints 105 <i>F. Ansay and P. Viaux</i>
9	Management of Technical Systems on the Farm 113 <i>C. Aubry, A. Havet and M. Navarrete</i>
10	In Common Existence of Decisionmaking Rules Concerning Planning Schedule of Operations 119 <i>A. Aviles Benitez and F. Jacquet</i>

11	Framework for a Diagnosis of the Sustainability of Agriculture, from the Plot up to the Regional Level <i>A. Capillon and D. Geneviève</i>	124
12	Sustainable Agriculture: A Technical or Economic Issue? Reducing Nitrate Water Pollution with Market Incentives <i>S. Cocco and A. Ciani</i>	129
13	Management for Sustainable Agriculture. A New Paradigm in the Balance Sheet: A Case Study <i>A. Ciani and S. Cocco</i>	134
14	A Model for Designing Sustainable Agroforestry Systems <i>M. Etienne and P. Herlant</i>	140
15	Influence of Agro-Environmental Constraints in the Analysis of Farming Systems in southern France <i>G. Guérin and Ch. Moulin</i>	147
16	The Process of Agroecological Transition in two Andalusian Regions: Antequera (Malaga) and Campina Baja (Cordoba) <i>G. Guzmán Casado, Y. Pouliquen, A. Alonso Mielgo and E. Sevilla Guzmán</i>	154
17	Impact of Livestock Farming Systems on Fire Prevention in French Cork Oak Forest <i>Ph. Masson</i>	159
18	The Process of Change to Sustainable Farming Practices <i>J. Park and J.D.H. Keatinge</i>	165
19	Input Substitution in Arable Farming Systems: Research Design and Effects on Farm Income, Productivity and Environment <i>C. Stoyke and H. Waibel</i>	169
20	Designing Sustainable Agro-Ecological Systems - Summary Report - <i>Vagn Østergaard</i>	174
III INTEGRATING SOCIAL AND TECHNICAL PERSPECTIVES IN NATURAL RESOURCE MANAGEMENT		
21	Overview and Discussion: Natural Resource Management <i>L. Omodei Zorini</i>	181
22	Linking Process to Impact: Some Findings on the Impact of Participatory Approaches to Soil and Water Conservation in Semi-arid South India <i>Barbara Adolph</i>	189
23	Farmers' Involvement in Forest Management in the Central Region of Portugal <i>C. Almeida, Ch. Garforth and A. Cristóvão</i>	194
24	Analysis of Changes on Farms Made Necessary by Constraints Concerning Protection of Water Quality <i>M. Gafsi and J. Brossier</i>	199

25	Indicators - A Method to Describe Sustainability of Farming Systems <i>Jens Peter Hansen & Vagn Østergaard</i>	205
26	The Know-how of Livestock Farmers Challenged by New Objectives for European Farming <i>Bernard Hubert, Christian Deverre and Michel Meuret</i>	211
27	Sustainability, Farming Systems and the MCDM Paradigm: Typification of Farming Systems for Modelling <i>C. Köbrich and T. Rehman</i>	219
28	Social Enquiry and the Policy Relevant Exploration of Agricultural Systems <i>M. Lemon and R. Seaton</i>	225
29	Bridging the Gap between Economics and Anthropology: The Use of Ethnoscience in Economic Analyses of Indigenous Economies <i>V. Mazzucato</i>	230
30	Sustainable Management of Natural Resources in Depopulated Areas: A Biotechnical Viewpoint in the Dynamics of Sheep-Farming. A Case-Study in South Massif-Central (France) <i>P.-L. Osty, S. Lardon and P. Triboulet</i>	237
31	The Ecological Knowledge System <i>N. Roling and J. Jiggins</i>	242
IV MAKING THE MOST OF AGRI-ECOLOGICAL DIVERSITY AND LOCAL KNOWLEDGE		
32	Overview and Discussion: From Farming Systems Research to Agroecology <i>Eduardo Sevilla-Guzmán and Graham Woodgate</i>	249
33	Systems' Interaction in Relation to Marginal and High Potential Zones in Madaba Governorate – Jordan <i>Al-Baqain, Raid and Doppler, Werner</i>	256
34	Traditional Knowledge and the Management of Vegetable Gardens in four Andalusian Municipalities (Spain) <i>Alonso Mielgo, A.M.; Pouliquen, Y.; Guzmán Casado, G.I. and Sevilla Guzmán, E.</i>	261
35	Agricultural Spatial Differentiation vs. Homogenisation: Some Empirical Evidences in Central Italy <i>Liano Angeli and Saverio Senni</i>	266
36	Fallows in a Prealpine Valley of Southern France: From Two-Course Rotation to Set-aside. Farmer Practices and Representations <i>Bellon, S., Chabert, J.P. and de Blic, N.</i>	271
37	Greenmanuring of Agro-Ecosystems through Etno-Ecology: Some Empirical Data from the Contraviesa (Spain) <i>Gaston G. A. Remmers</i>	277

38	Rapid Rural Appraisal in the North-western Iberian Peninsula: Initial Outcomes <i>Xavier Simón Fernández</i>	282
39	Towards Social Management of Livestock Farming Systems <i>B. Vissac</i>	286
40	Report: Making the most of Ecological Diversity and Local Knowledge <i>João Castro Caldas</i>	294
V POLICY AND INSTITUTIONAL DEVELOPMENT		
41	Overview and Discussion: Institutional & Policy Developments <i>Barry Dent</i>	299
42	Farming Systems Perspective in Auvergne and Limousin <i>J.-P.Bousset, A.Busselot, G.Baud</i>	305
43	A Cognitive Mapping Approach for Policy Evaluation and Prospective <i>Anne Busselot</i>	310
44	Demand for Institutional Innovation in the Spanish National Agricultural Research Model (NARM): The Need for a System-based Approach <i>Javier Calatrava</i>	315
45	Involving Farmers in Institutionalization Procedures - The Case of AOC Unions <i>Casabianca; F., de Sainte Marie; Ch., Prost; J.A. and Dubeuf; B.</i>	321
46	Environmental Policy under CAP Reform in the Hilly Central Italy <i>Gabriele Dono and Claudio Locchi</i>	327
47	Institutional Development Promoting Agricultural Credit in Slovakia <i>Axel Wolz</i>	332
48	Report of Discussion: Policy and Institutional Development <i>Jacques Brossier</i>	338
VI TRAINING		
49	Overview and Discussion: Systems Thinking in Agricultural Training - Exchanging Ideas, Changing Practices <i>Artur Cristóvão</i>	343
50	Sustainability: Implications for Agricultural Extension, Education and Training - The Greek Case - <i>Koutsouris, A. and Papadopoulos, D.</i>	353
51	A Training Approach in the Field of Livestock Farming Systems and Animal Products Chains: An Initiation to Projects Engineering about the Charolais Beef Production <i>J. Lossouarn, C. Mariojouis, P. Chapoutot, X. Rognon</i>	358

rural development policy, approaches for rural development, strategies of rural development. and other strategies promoting rural development. Keywords: Approaches, Capabilities, Policies, Rural Development, Strategies. When one is researching upon the concept of rural development, then it is referred to. the overall development of rural communities.Â independent self-reliant economy, establishment of social system, based on equity and justice, reduction of regional imbalance and implementation of advanced technologies. Some of the.Â The approaches for rural development need to focus upon making provision of. remedies to the problems, experienced by rural individuals. These problems mainly include The article deals with the legal and social aspects of sustainable development of rural areas in the Russian Federation. The materials and recommendations of the parliamentary hearings of the state Duma Committee on agrarian issues were used in the preparation.Â The situation is aggravated by the accumulated problems of technical and technological lag, the low level of profitability of agricultural producers, the weak competitiveness of domestic products. Under these conditions, state support for the accelerated development of the agro-industrial complex should be based on the following principlesÂ Improving program-oriented approaches for the sustainable development of rural. areas. Effective Approaches for Rural Development. Definition of Poverty in DAC Guidelines on Poverty Reduction. Poverty is multidimensional and includes factors other than income (such as education, health, politics, and society, vulnerability etc.).Â Rural development aims to improve livelihoods by implementing comprehensive development for rural areas where a majority of people in poverty live. Rural development can also contribute to reduce poverty in urban areas by reducing excessive population influxes from rural areas. 2-3 Effective Approaches for Rural Development. Although the trickle-down theory was based on the belief that an expanded macro economy could improve the living standards of impoverished people, its effectiveness has been questionable.
